Profile

Fullstack Software Engineer with 4 years of professional experience building and shipping production software in fast-moving environments. Background rooted in frontend engineering (**React.js**, **Next.js**, **TypeScript**), evolved into end-to-end product development spanning backend systems, APIs, real-time communication, and blockchain/crypto infrastructure. Currently working as a backend engineer on cryptocurrency wallet systems and prediction markets, with a strong focus on **AI-native**, **Spec-Driven Development** workflows using **multi-agent** coding tools.

Experience

Nexus

Backend Engineer – Blockchain & Crypto Wallets

In-Person, Brazil

March 2026 – Present

- Work on backend systems for **cryptocurrency wallets** and **blockchain** infrastructure, both for in-house products and as development services provided to other crypto wallet companies.
- Specialize in **prediction markets** within the crypto/wallet ecosystem, designing and building the backend logic that powers them.
- Operate with an AI-native, **Spec-Driven Development** approach: define rules, architecture, and constraints first, then execute using multi-agent coding workflows (**Claude Code**, agent loops, git worktrees) to accelerate delivery and improve system design quality.
- Manage **Linux VPS deployment**, proxy configuration (including proxychains), and **CI/CD pipelines** (GitHub Actions) for production services.
- Work with **Node.js** and **Prisma ORM** for API and database layers, alongside SQL, REST, and webhook-based integrations.

Dvelopers

React.js Developer

Remote, Brazil

May 2025 – March 2026

- Developed modern, responsive interfaces with **React.js**, **Next.js** and **TypeScript**, applying best practices in component architecture.
- Created and maintained reusable components with **Styled Components** and **TailwindCSS**, ensuring visual consistency and code scalability across the application.
- Implemented form validation with **Zod** to ensure correct typing and improved user interface reliability.
- Integrated REST APIs using **Axios** and **react-query-kit**, optimizing data fetching and state synchronization.
- Participated in agile teams (Scrum), contributing to clean code practices, Git versioning, and code review workflows.

JPLAN

Low-Code Developer and UI/UX Designer

Remote, Brazil

March 2022 – May 2025

- Developed low-code applications, streamlining internal business processes and reducing manual workload.
- Designed and refactored user interfaces, improving usability and visual consistency across platforms.
- Automated repetitive business processes, increasing operational efficiency for end users.

Skills

- **Backend & Infrastructure:** Node.js, Java, Spring Boot, PostgreSQL, Prisma ORM, SQL, REST APIs, WebSockets, Webhooks
- **Blockchain & Crypto:** Cryptocurrency wallets, blockchain systems, prediction markets
- **AI-Native Engineering:** Claude Code, Spec-Driven Development, Multi-Agent workflows, Agent Loops, Git Worktrees
- **DevOps & Tooling:** Linux VPS Deployment, Proxy Configuration, Proxychains, GitHub CI/CD Pipelines, Git
- **Frontend:** React.js, Next.js, TypeScript, JavaScript, React Hooks, Zod, Axios, React Query, Styled Components, TailwindCSS, React Testing Library, Jest
- **Design:** Figma
- **Languages:** Portuguese (Native), English – Intermediate (B2 – EF SET Certificate)

Education

UniCesumar

B.Sc. Software Engineering

Maringá, Brazil

2018 – 2022
